Phone Number	+201028239305
GitHub Repository	https://github.com/mosb23/Quote-App
Project Type	Flutter / Dart mobile application

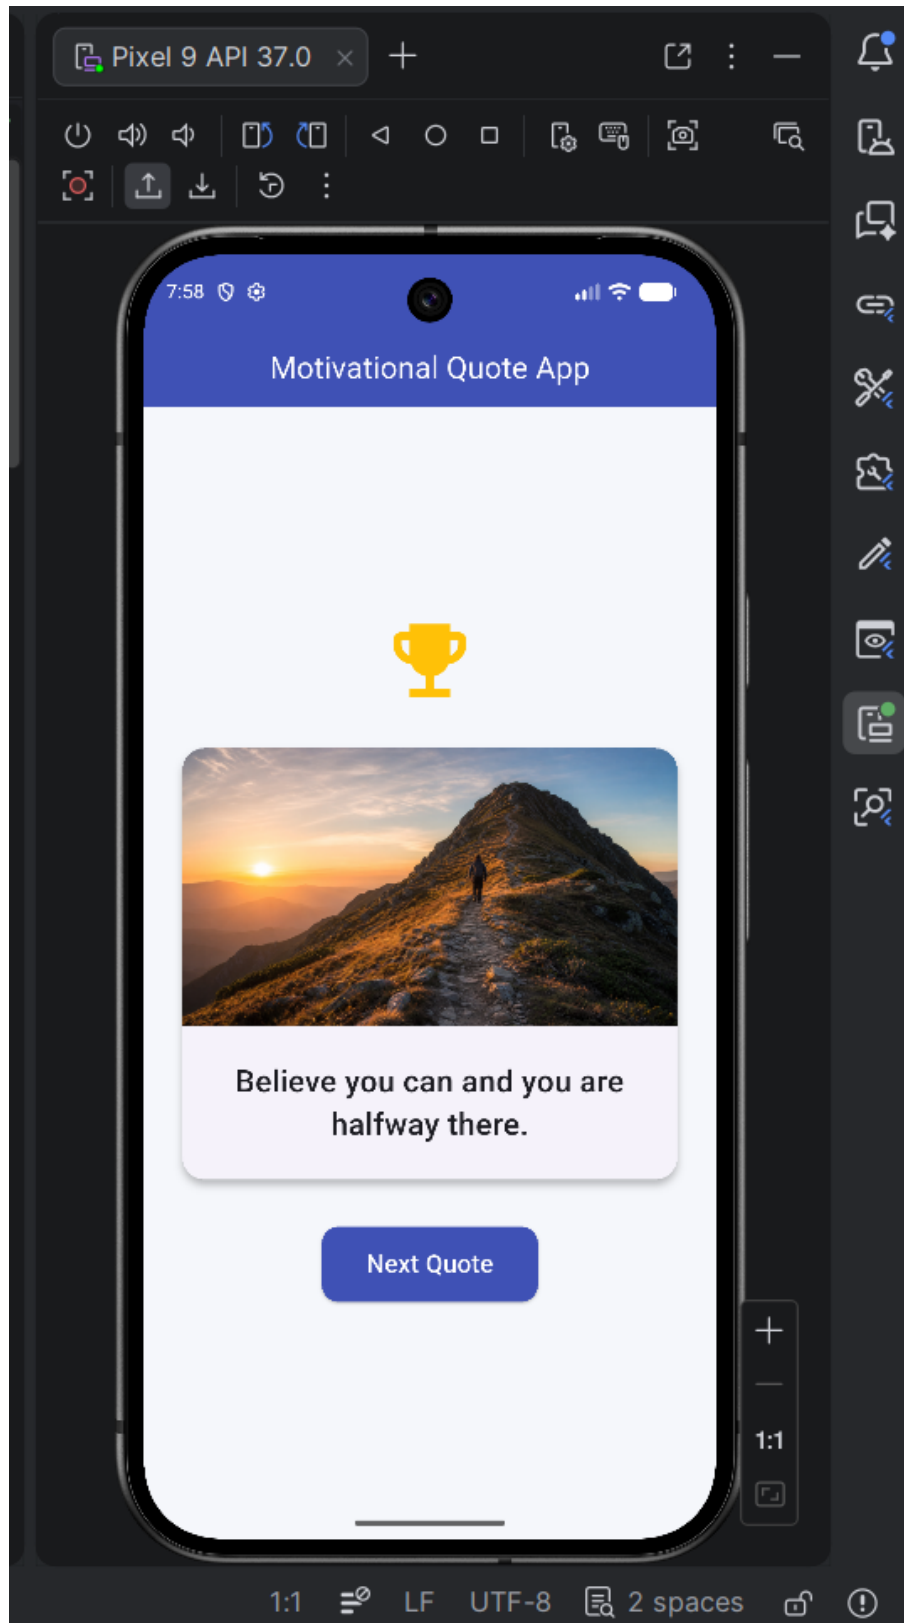

Short Explanation

This Flutter app displays motivational quotes one at a time. It uses MaterialApp, Scaffold, AppBar, StatefulWidget, a List for the quotes, another list for the related local image assets, and an integer currentIndex. When the user presses the Next Quote button, setState updates currentIndex using modulo so the app returns to the first quote after the last one. The design uses a light background, centered layout, a motivational icon, rounded Card, readable typography, and local images.

Submission Contents

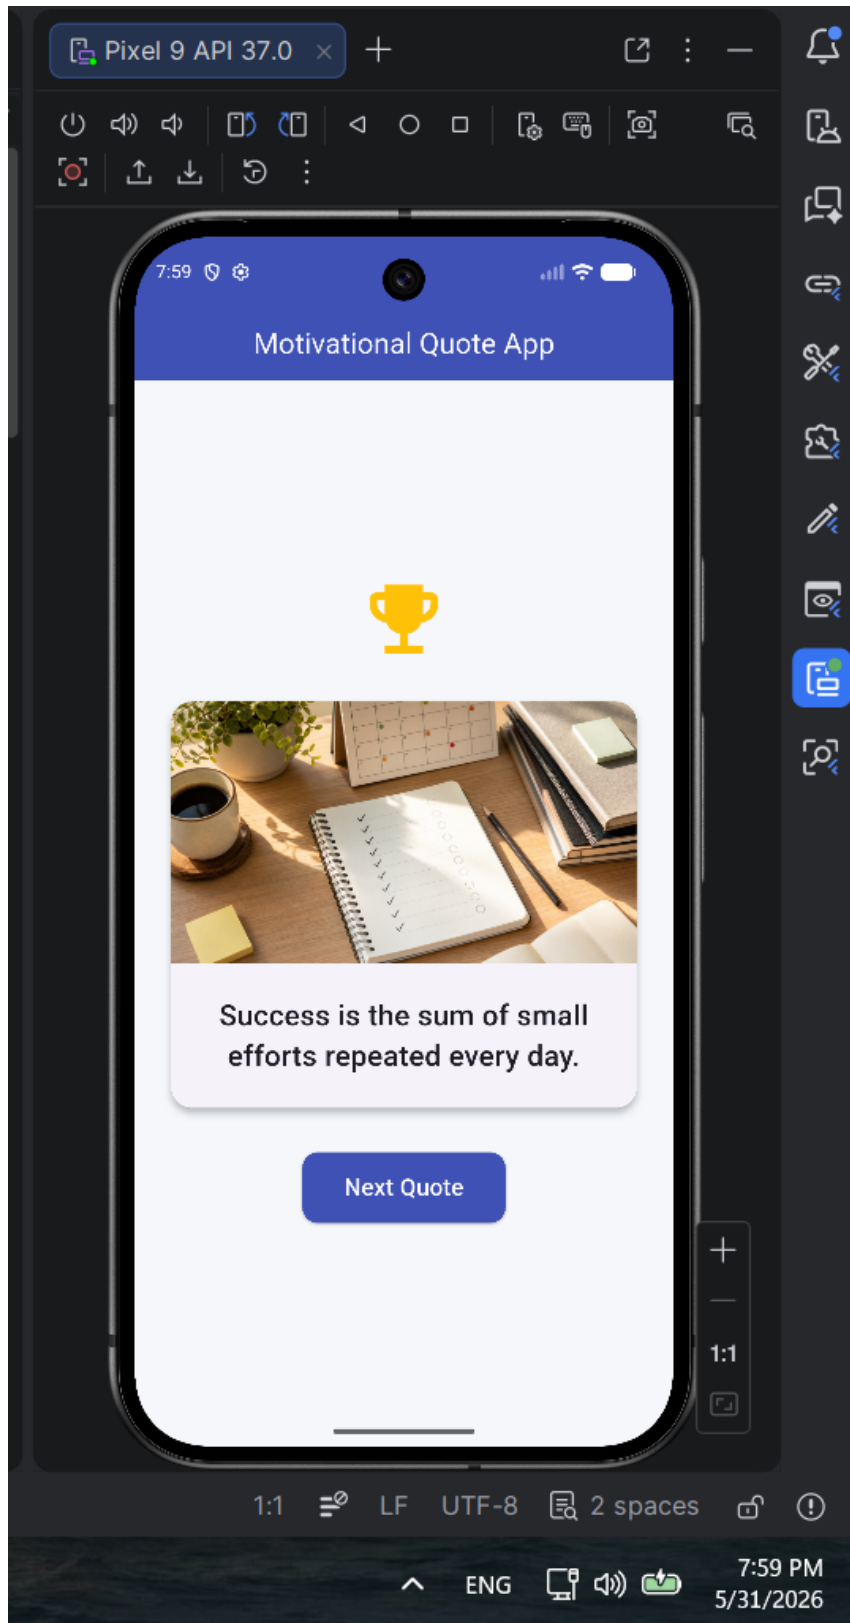

This PDF includes emulator screenshots of the app output, the full lib/main.dart source code, and a short explanation of how the app works.
